

ZURFLÜH-FELLER

Alureno range

Aluminium end plate range

The Alureno end plate is suitable for most shutter boxes on the market

📏 Several sizes available according to model: ↗ 125 ↗ 137 ↗ 150 ↗ 165 ↗ 180 ↗ 205

🎨 Large choice of colours

Advantages of our 45° and quarter round versions:

🔪 Installation made easy

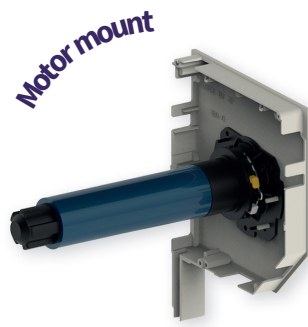

The 3 securing pins are used to quickly secure

- + Vis-frein® and Technivis® gearboxes, without machining, without any screws or additional parts
- + Motors, without machining or any screws, using an identical bracket for all shutter boxes size 125 to 205
- + Various brackets that do not require drilling the end plate

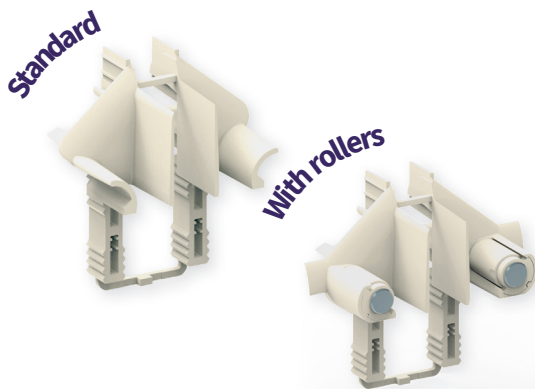

📍 Peripheral marks make it easier to fasten the shutter box

🔄 Multipurpose backing plates for both versions

- + 🔑 = 🔪 × 1 ➡ Simplified work steps: only the inner screw needs to be loosened

We design specially made entry guides

- + Ensures silent and reliable operation over time
- + Two versions available for 8 and 14 mm laths
- + Allows for top end stop function and thus to make the end slat move up as far as possible up into the shutter box
