

ZURFLÜH-FELLER

Strap operation

A solution for each
type of installation

Open Up®

Conviv®

Rounded Open®

Flush-mounted

Surface-MOUNTED

Open® or Conviv®

The choice of materials and components guarantees the proper operation of ZF coils over time (endurance test performed for 10,000 cycles, i.e. more than 10 years).

- + Coiler case made of UV-stabilized technical plastic
- + 100% polyester strap > no risk of marks or dirt
- + Can be swung round to 180° and suitable for installation on narrow frames to create more space for a large window opening angle.
- + Quick and easy to install

The Open® and Conviv® ranges feature a harmonious look and are available with the following options:

Several colours

With or without strap
(12 or 14 mm)

Available in square or rounded version
for Open®

FLUSH-MOUNTED installation in window or door frames

Flush-mounted coiler

The flush-mounted coiler is both functional and aesthetic and is concealed in the frame of doors or windows. The cover plate available in several colours provides a clean finish. Endurance test performed for 7,000 cycles.
